

# Our SaaS Solutions Deliver Value at Every Turn

# Our SaaS Solutions Deliver Value at Every Turn

SaaS (Software as a Service) is a service model in which applications and software are hosted by a third-party provider and made available to you via the Cloud. SaaS has been growing in popularity due to the ease in which software applications can be deployed and accessed, without businesses having to spend their own time and resources on installing, configuring, and updating the software themselves. Simply put,

SaaS gives you access to the software you need on demand for quicker.

So how exactly can SaaS benefit you? At Pro OnCall, our SaaS solution gives you direct access to the latest innovations without having to worry about purchasing additional hardware or software. That means you can stay focused on your tasks without having to manage technology to support your needs.

## The Advantages of SaaS

As companies seek better flexibility and speed, the shift to SaaS has become a catalyst for increased application adoption and delivery. Pro OnCall offers an advanced suite of business-critical applications using the SaaS model. Here are the major perks of switching to SaaS:

## Save on Hardware and Software Costs

Say goodbye to hidden fees and unexpected upfront costs. When your data and applications are hosted in the Cloud, you no longer need to purchase, install, configure, or maintain additional hardware or software. All of your applications are hosted and delivered in our secure and reliable Cloud platform for a flat monthly rate.

## Quick and Painless Upgrades

You have enough on your plate as it is. Don't get overburdened by having to take care of pesky software updates, upgrades, and renewals on your own. When you switch to our SaaS model, we'll proactively take care of all that seamlessly, providing ongoing maintenance to keep your business up-and-running.

## Fast and Easy Adoption

Selecting and deploying new business applications the traditional way may take weeks or even months. On top of that, you may have questions about the integration left unanswered. With Pro OnCall's SaaS

solutions, users are able to access their applications and data through a secure Internet connection, and we provide ongoing 24/7 support.

“SaaS (Software as a Service) is a service model in which applications and software are hosted by a third-party provider and made available to you via the Cloud.”
